Hello

I've been working as a Software Engineer for 15+ years, and I love hands-on coding, with vast experience in all aspects of web applications, backend, frontend and full-stack roles.

Nowadays I tend to focus more on the FE side with strong skills in Typescript, React (Redux and Sagas), Node (NestJS & Next.js) and GraphQL.

I'm also a strong advocate for readable & maintainable code & tests, and I'm always happy to share knowledge, guide and mentor others to achieve their highest potential.
